Re: Response to Request for Information Pursuant to S 3007 of
the Resource Conservation and Recovery Act (the "Request for
Information")

Facility Name: Bermite Division of
Whittaker Corporation
Facility Address: 22116 W. Soledad Canyon Rd.
Saugus, CA 91350
Identification No.: CAD064573108

Dear Mr. Bobel:

This letter is submitted in response to Item Numbers 1 and 2 in
the referenced Request for Information from Harry Seraydarian,
Director, Toxics and Waste Management Division, EPA Region IX,
received by Bermite on November 08, 1985.

Until their closure in 1983, two RCRA land disposal units were
located at the Bermite facility:

1. Impoundment 317, a lined surface storage impoundment, and
2. Impoundment 342 (also known as the Red Phosphorous Lagoon),
a lined surface storage impoundment.

All waste and the liners were removed from each of these units,
and the units were closed, in 1983. Bermite is currently
consulting with the California Department of Health Services
regarding certain procedural questions which have arisen in
connection with the closure of these impoundments. However, the
impoundments no longer exist and no wastes have been placed in or
near the impoundments since their closure in 1983. As such, no
Part B Application or certifications were submitted for either
unit.

If you have any questions regarding this response, please contact
me.

Very truly yours,

Thomas J. Bloom
Director Environmental Affairs
